Are you hearing this term for the first time?
WOW, magnets attracted as you are on the right blog:
"A to Z about **Hair Transplant**"

[Hair transplant in Ludhiana](#) can be performed by any of the following techniques:

- FUE
- FUT
- Bio FUE

FUT

It stands for Follicular Unit Transplantation. It was the first-ever procedure that helped to transplant the hair from one part to another. It can be thus deemed as the parent procedure. The strips of the hair follicles are extracted from the donor areas and are then implanted in the recipient zone. This procedure can be accomplished in just a sitting.

FUE

It is an advanced version of FUE. There is a rumour spread about this procedure which says, "FUE **Hair transplant cost in Ludhiana** is more than FUT". But the actual grounds on which the FUE cost is determined is the number of grafts to be implanted. This procedure provides an even more natural look as the grafts are implanted in exactly the way the hair is grown naturally.

Bio FUE

This is a modern procedure that involves the extraction of blood from the arm. It is then placed in the centrifuge where the PRP is separated and is filled in a different injection. It is then injected into the scalp so that the new hair follicles can be triggered for regrowth.
